Sample Document

Author: John Doe

Subject: JSON to PDF Conversion

Introduction

This is a sample document that demonstrates the conversion from JSON to PDF using Spring Batch and Apache PDFBox.

The document structure is defined in JSON format and then processed to generate a PDF document with proper formatting.

Features

This converter supports the following features:

- Document metadata (title, author, subject)

- Multiple sections with headings

- Text formatting

- Automatic page breaks

Implementation

The implementation uses Spring Batch for processing the JSON data and Apache PDFBox for generating the PDF documents.

Spring Batch provides a robust framework for batch processing, while PDFBox offers comprehensive PDF manipulation capabilities.
